

REAL-TIME INFORMATION ON ALL OF YOUR CLEANING OPERATIONS

Presented by Real Time DC -software and hardware solutions

REAL LINK AT A GLANCE

Cleaning Services Management App

Real-Link is an ideal solution for contract cleaning. Using NFC enabled mobile phones and RFID tags you get guaranteed proof that a cleaner has been to a client's site, when they were there and for how long. Instructions for each site can be sent to the cleaner via the phone and they can also capture further information, such as products used or issues that may have arisen.

You have access to all of this information in real-time- no checking log cards or typing up information after the event. There is also no need for an expensive electronic clocking in and out system or a device that must be hard-wired to a network, as REAL-LINK can work from a mobile phone or a cost-effective Timebox.

NFC technology allows the collection of data, which is then transferred immediately to the server meaning that you can access the information from a web-based login.

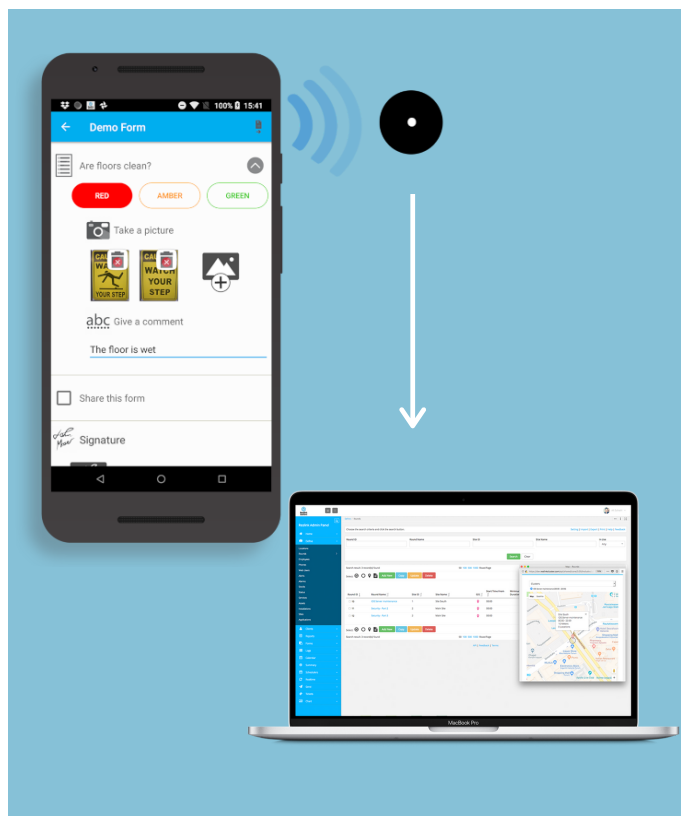

WHAT IS REAL-LINK?

RealLink is an app dedicated for monitoring, regular-checking and digital reporting.

It can be used in a variety of contexts including but not limited to incident reporting, area manager reporting, time and attendance, asset checks, toilet/fire doors/noise checks, lone worker rounds.

How does REAL-LINK work?

- Cleaning operative arrives at each client site/location, scans NFC tag with their Real-Link enabled mobile phone which transmits their name, location and the time in real-time, via the mobile network or Wi-Fi.
- Location specific data can be displayed on the phone for staff instructions or for capturing additional details such as specific cleaning tasks that must be carried out.
- All the details are sent to the server in real time via the mobile network/WiFi
- The data is instantly available via cloud-based back office to enable monitoring of employees and their work. If you are on-the-go, automated reports and alerts are available via email and text message.

Features of REAL-LINK time and attendance system

- **Real-time proof** that patrols are being performed
- **Easy to use** solution that runs on a mobile phone
- Works on a **mobile network, Wi-Fi** or offline mode
- **Real-time reporting**-photos, video, text, lists etc.
- **Real-time alarms** of incidents by email or SMS
- **Cloud-based reports**
- **Automated reporting:** daily, weekly, monthly activity logs
- **GPS monitoring and tracking**
- Geo-fence locations, sites and employees
- **Live monitoring** of employees
- **Location-specific tasks** including alarm call-outs
- **Alerts** on missed tasks
- Supervisor site visits
- **Lone worker protection**- SOS, active monitoring

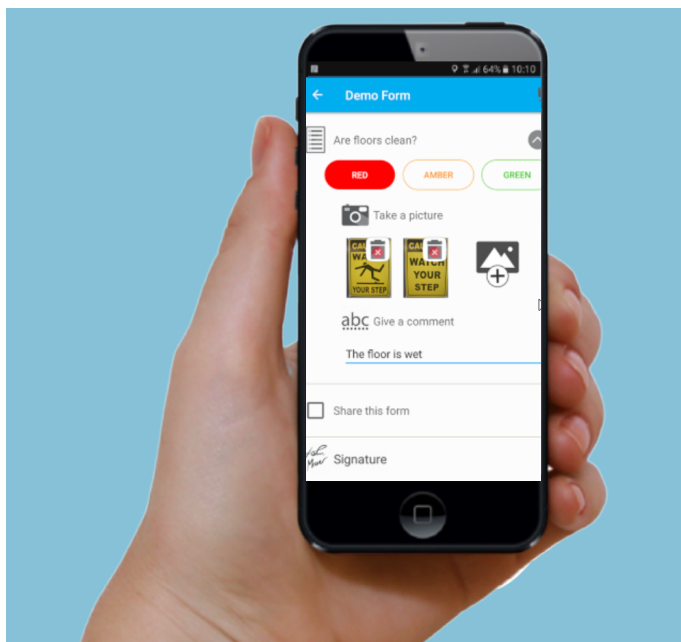

Benefits of REAL-LINK time and attendance

- **Provide evidence** to your clients
- **Only mobile phone required;** no separate devices
- Deal with incidents **quickly** and **effectively**
- **Remove all paper forms** that need typing up, filling and at risk of being lost
- **Cloud-based reports** allow any-time access to data
- **Improved safety** of employees with **lone worker features**
- **Complete audit trail** on your field operations
- Higher **customer satisfaction** and higher **ROI**
- Help **win new contracts** by offering complete transparency to the customer
- **Quick ROI** by removing time spent on paperwork/reports, increased business due to satisfied customers

Tailor-Made Forms

Tailor-made forms can be created for your Real-Link application for quick and accurate reporting that is available in real-time.

Remove the wasted time spent typing forms up and finding space to file them. Do them all on our mobile app. This could include site visits, appraisals, and quality control assessments as well as many others.

REAL-LINK is easy to use, quick to deploy, and it can be fully customised for your operations, or delivered and used straight out of the box with our standard set-up.

RealTime DC makes everything as easy as possible for you providing full support, set-up and training.

Affordable Integration

We understand that most businesses do not have unlimited money to spend on technology.

This is the reason that most of our software solutions are charged on a monthly or quarterly basis instead of a large upfront cost. We offer free support and guidance.

RealTime DC provides Real-Link services for the following:

*building sites,
outdoor events,
facility management companies,
schools, colleges, universities,
multiple-site businesses,
casual labouring,
bar, restaurants, nightclubs,
security companies and many more...*
