

REAL-LINK CLEANING

Powered by RealTime DC Ltd

Custom-built cleaning services application for managing your cleaning staff and assets .

**Real
Link**

REAL-LINK AT A GLANCE

Real-Link is a management software solution, fully customisable, deployed in various industries and job contexts.

Real-Link is installed on a mobile device to allow the collection of data which is then transferred in real-time to a secure cloud-based server and can be accessed and exported via a web-based login.

HOW DOES IT WORK?

Employees will be assigned with individual logins to access the Real-Link application that is installed on mobile devices.

The cleaning operative arrives at each client site/location and scans an NFC tag with their phone which transmits their details via the mobile network/Wi-Fi.

Pictures, signature, time, date and any other

BENEFITS

- **Portable and paperless solution - Easily moved to different locations and sites and access data from anywhere.**
- **Complete audit trail on your field operations**
- **Proof of compliance - Reports show who has been on site and for how long**

additional information collected are sent in real time as a report.

Location specific data can be displayed on the phone for staff instructions or for capturing additional details such as specific cleaning tasks that must be carried out.

Supervisors can have access to the reports and track which employees via the web portal.
